Building block view

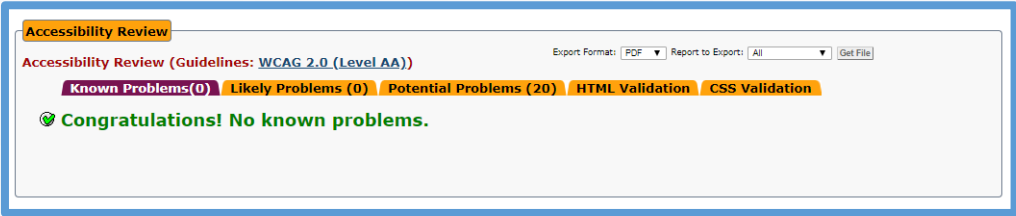

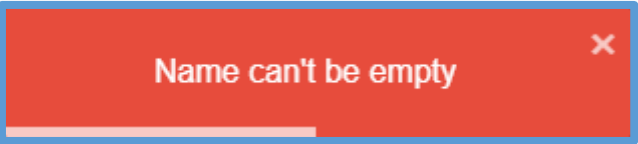

How does Route Creation Work?

A person is silhouetted while sitting on the edge of a dark, craggy rock. The sun is low on the horizon behind them, creating a bright glow and lens flare. The background is a light blue sky. A thick blue diagonal stripe runs from the top left towards the center. Another thinner blue diagonal stripe is visible on the right side of the image.

Testing environment

Create a route

Given: An already registered user at route creation view

When: Creating a route

Then: The route is created

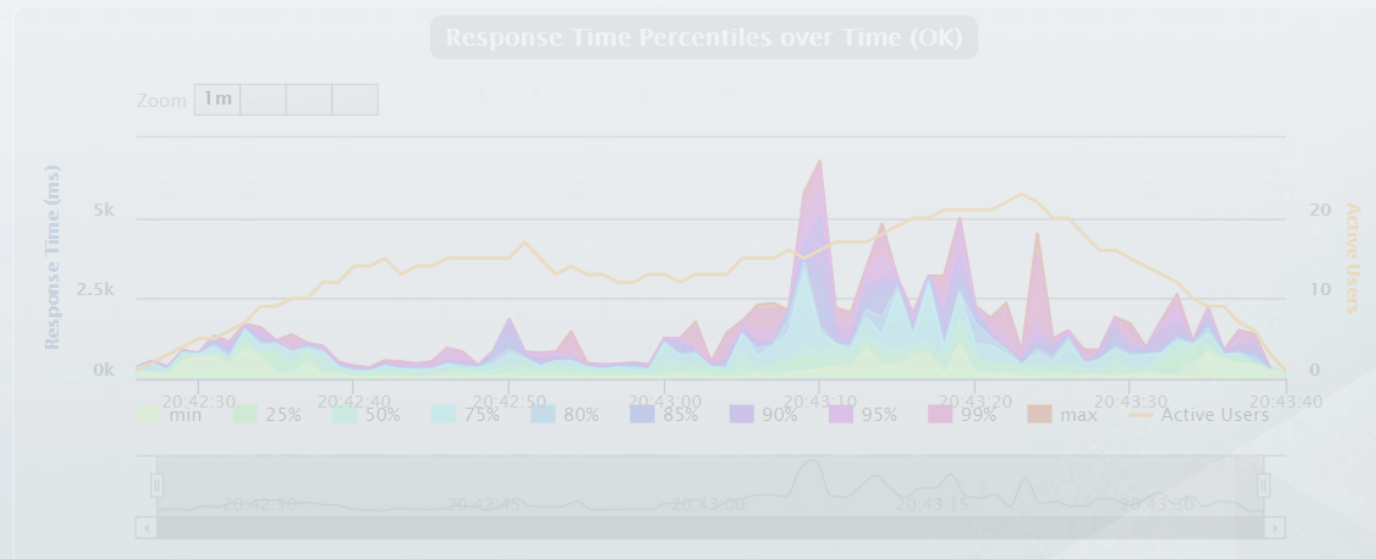

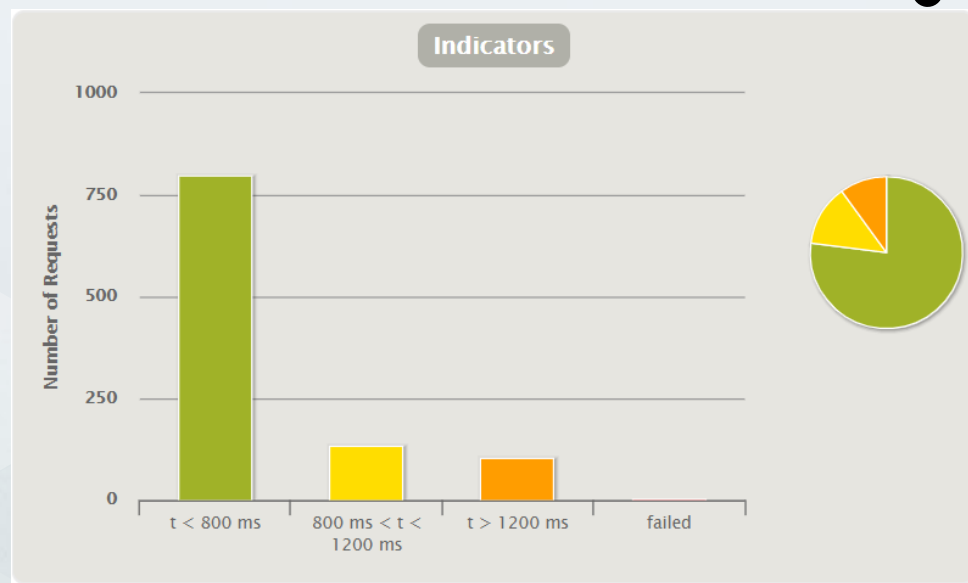

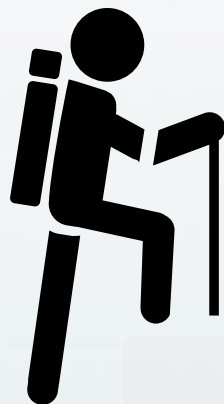

Error pops up when no data at all when creating a route

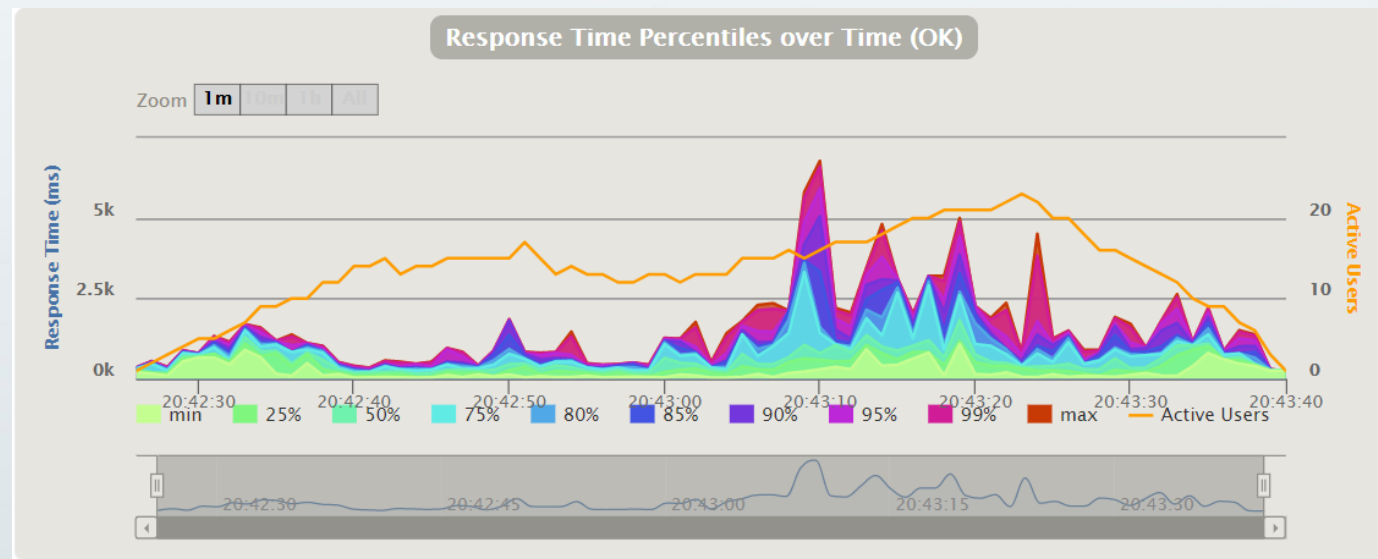

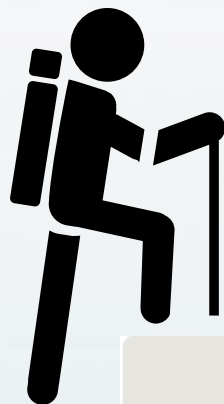

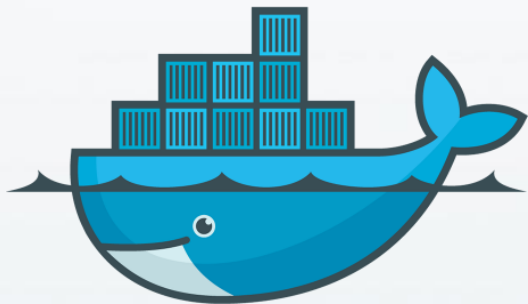

Given: An already registered user at route creation view

When: Creating a route with no data

Then: The route is not created and two popups appear

Demo time

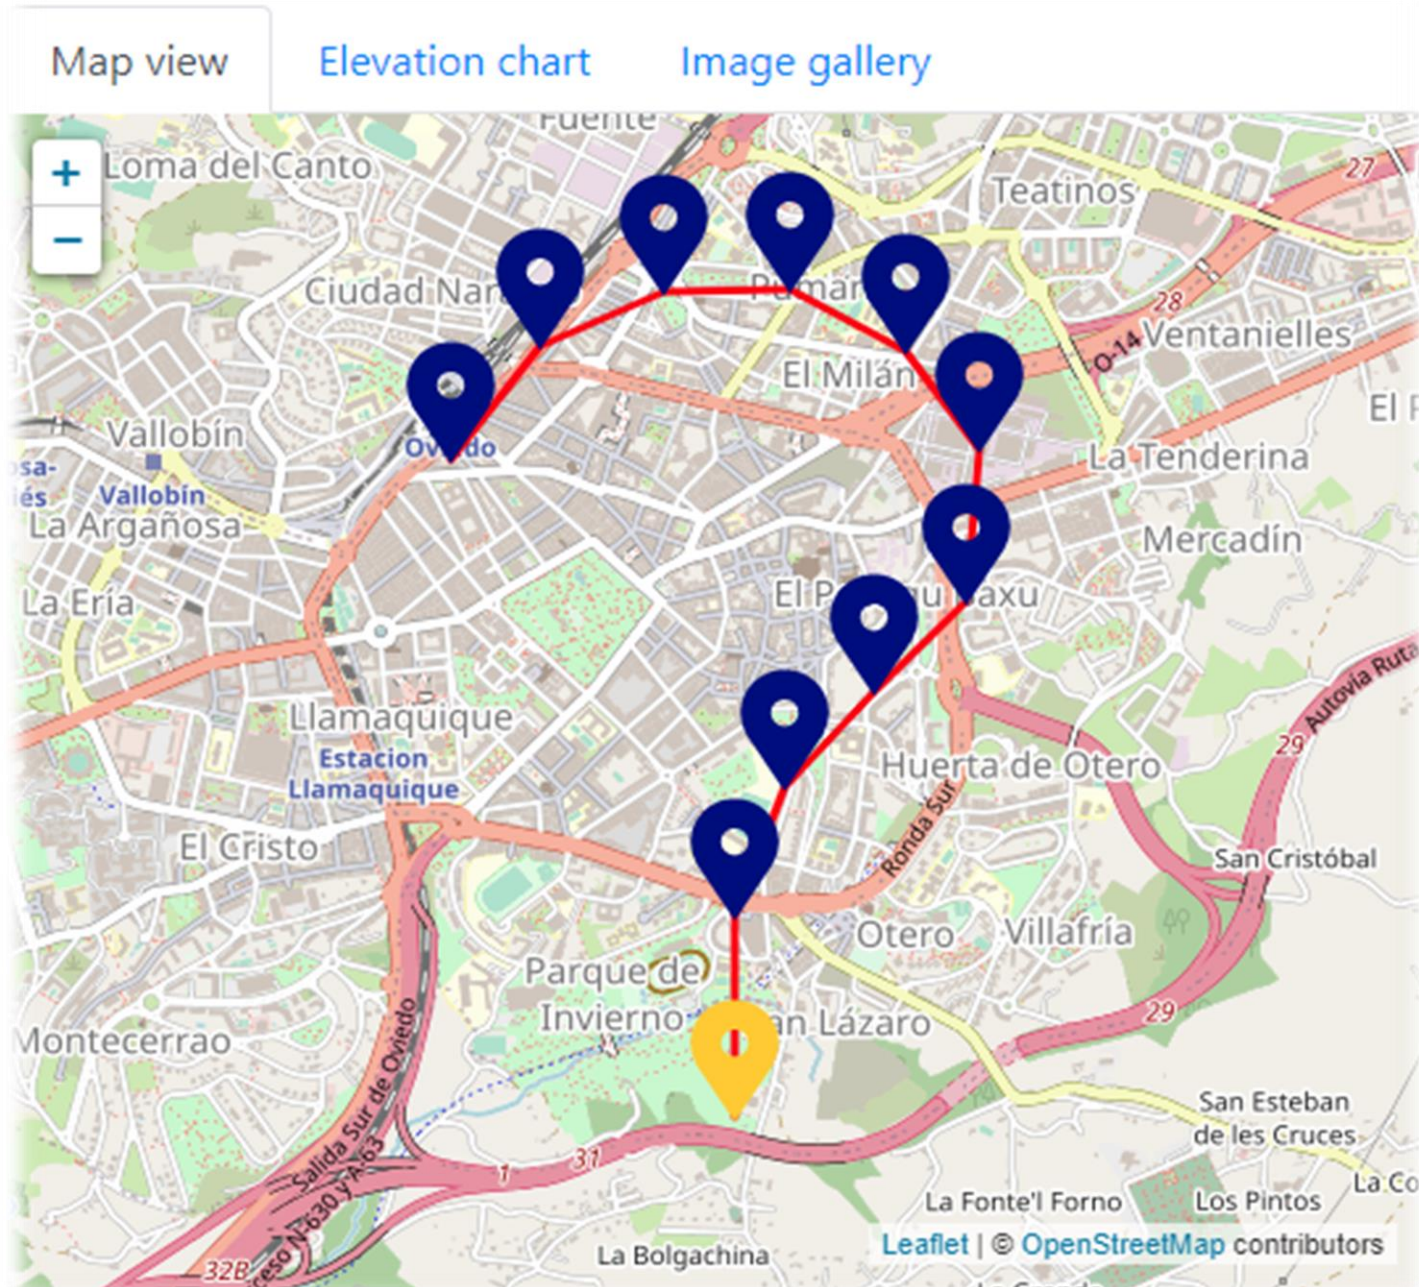

Bienvenido a Viade

Tu aplicación de rutas

A person with a large backpack stands on a grassy hill, looking out over a landscape at sunset. The scene is framed by a large, light-colored triangle that points upwards. The sky is filled with soft, orange and pink clouds. The person is silhouetted against the bright sky. The overall mood is peaceful and contemplative.

Issues

Solid.community rolled back to 5.2.3

bourgeoa

15d

@all

Due to regression problems with ac1 PUT and POST using NSS 5.2.4 (see comments in [solid/node-solid-server#1418](#)) solid-community server has been rolled back to NSS 5.2.3

It is up and running.

We hope it was without too much problems.

Inrupt Regression

Inrupt servers had to undergo a version regression due to an error that they have detected

01

Map Testing

Inability to test an interactive component due to the lack of a “click” interface thing for testing

02

03

Not all type of media showed

Images are shown but reproducing videos and other type of media haven't been implemented.

04

SOLID POD configuration not working

Equal configuration for two different PODs would yield different results of execution of our application
